## **For More Information**

The **Japan Information Access Project (JIAP)** is a membership nonprofit research center studying the US-Northeast Asian relationship on technology, security, and public policy issues. Its members include the leading American policy officials, analysts, and institutions working on Japan and Asia. JIAP has over 11 years of experience introducing new research, analysis, and information to the Asia policy community in the United States.

JIAP publishes a twice-weekly electronic report on events, news, opinion, research, data and resources regarding Japan and Northeast Asia. In addition, JIAP presents public and private programs, publishes research papers and guides to assist researchers, and answers questions from the public on Northeast Asia. JIAP also organizes the *Asia Group*, a private discussion forum for women Asia security professionals.

JIAP has an active research program to assist its members. Topics include, Asian regional security, generational change, piracy, energy security, US-Japan relations, Asian intellectual property, international economic issues, health care, telecommunications, Japanese public opinion, North Korea, cross-strait's relations, and cyberwar. JIAP has worked with the Japan-US Friendship Commission to disseminate to the Washington policy community the research results of its grantees. JIAP has also worked closely on programs and research with the US Air Force, Commerce Department, US Patent & Trademark Office, US Library of Congress, the Baker Institute, SAIC, and CSIS.
